DETAILED ACTION

1. Receipt is acknowledged of Applicant's Preliminary Amendment, filed May 8, 2001.
2. Receipt is acknowledged of Applicant's Prior Art Statement, filed September 19, 2001, and February 3, 2003, respectively.
3. Claims 24-33, 35, and 46-54 have been canceled.
4. Claims 1-23, 34, 36-45, and 55-58 are presented for examination.
5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

6. Claim 44 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 36 of prior U.S. Patent No. 6247998. This is a double patenting rejection.

Art Unit: 3723

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claim 42 is rejected under 35 U.S.C. 102(a) and (e) as being clearly anticipated by Sun et al(US 6010538). Sun et al disclose all of the subject matter set forth in applicant's claim 42.

Note the use of a light emitting diode to generate a light beam and a sensor to measure the interference signal generated by the reflection of the light from different surfaces to determine the endpoint.

9. Claims 1-23, 34, 36-41, 43, 45, and 55-58 are allowed.
